

# MEDIA FURNITURE – CONSOLES & STANDS

Flexible · Modern · Functional · Individual

[KUCHEM.COM](http://KUCHEM.COM)

## EXPERTS IN MEDIA TECHNOLOGY

For 40 years, Kuchem Konferenz Technik has been your reliable and competent partner for high-quality media, conference and event technology.

We are at your service with around 150 employees. At our three main locations in Bonn, Cologne and Berlin, we offer you the planning, rental, installation, maintenance and sale of media technology.

As a system house, we are your specialist for the installation of complex media systems – from the smallest meeting rooms to congress centers and event halls.

Personal consultation, customer satisfaction and state-of-the-art technology are our top priorities.

## RANGE OF SERVICES

### **Our range of services includes:**

- Needs analysis and concept development
- Technology consulting and product selection
- Factory and implementation planning
- Specification and programming
- Installation and commissioning
- Operator training and documentation
- Service and maintenance

## KUCHEM MEDIA FURNITURE

With our modern media furniture we offer solutions in timeless design for the integration of displays and media technology.

Whether as a solid display stand, presentation module, fully equipped speaker's lectern or high-end multimedia system – all our products can be individually configured and adapted according to customer requirements.

Mobile and flexible in use, our media steles are perfect for any conference room, for product presentations and for trade fair use.

# ORGANIZER / GRAND ORGANIZER

**With the ORGANIZER series every presentation becomes an eye-catcher!**

The basic model is ideal for presentations and lectures. The modern stele offers with the 43" to 75" large display and an integrated video conferencing system, the optimal exchange on digital way.

The front sockets and retractor slots provide a convenient power supply for external devices and a direct connection to the display. In addition, a lockable technology compartment serves as storage space and for accommodating further technology components.

## Features

- > 43"/65" display
- > video conferencing system
- > 2 retractor slots to choose from
- > 2 x power sockets with protective contact
- > lockable technology compartment

# COMMUNICATOR

**The COMMUNICATOR is the communication talent among the media steles.**

This model has an integrated media control and can also be used as a video conferencing system with video camera and speakers. It can be used flexibly and can be positioned anywhere in the room.

The integrated Barco ClickShare system allows digital content to be transferred wirelessly to the 55" to 65" display. The COMMUNICATOR also provides sufficient storage space for technical equipment in a lockable technical compartment.

## Features

- 55" display
- video conferencing system
- integrated media control
- Barco ClickShare
- 2 x cables (3m usable length)
- lockable technical compartment

# SOCIALIZE

**The SOCIALIZE is the optimum solution for presentations and customer meetings.**

Our SOCIALIZE is ideal for presentations and customer meetings which can be done standing as well as sitting at this model! Due to the integrated bench, the stele allows direct dialogue and at the same time a view of a 32" to 43" display. The integrated sockets and retractor slots allow a convenient power supply and connection to the display. Even more convenience is provided by an optional table tank, which offers further individual connection options.

## Features

- 32" display
- meeting bench
- 2 retractor slots to choose from
- 2 x power sockets
- lockable technology compartment

# CUSTOMER STOPPER

## Our CUSTOMER STOPPER catches every glance.

Advertising displays were yesterday! Set visual stimuli to inform customers, direct guests or present content. Flexible and modern, two keywords that are reflected in our in-house development.

The transportable digital signage display was designed as a free-standing stand and presents digital content for any occasion. It requires no fixed installation and can be set up at any location. Via the integrated media player, media files of all common formats can be played comfortably. The sturdy metal frame holds a 43" display and is available powder-coated in all common RAL colors.

## Features

- › 43" display, 24/7 operation
- › integrated media player
- › matte display without reflection
- › sturdy metal frame
- › available in all RAL colors

# MEET EM ALL I + II

**The MEET EM ALL offers a „best of“ our media stelae and combines various useful features.**

The stele can be equipped with 55" to 98" displays. Various digital sources can be conveniently and clearly controlled via the integrated touch panel. In total, the MEET EM ALL has six individually selectable retractor slots and can be expanded with a video conferencing system if desired. In addition to the generous storage area, there is also sufficient storage space for documents, advertising material and additional equipment in the body of the stele.

## Features

- **MEET EM ALL I:** 55" display
- **MEET EM ALL II:** 85" display
- Touch panel control
- Barco ClickShare
- 6 retractor slots to choose from
- 2 x USB / USB Charger

# MEET EM ALL DOUBLE

**The MEET EM ALL DOUBLE enables presentations and video conferences on two 65" displays.**

The special feature of this stele is the two parallel 65" displays. The integrated touch panel enables the control of the individual digital sources. This version of the MEET EM ALL also has six individually selectable retractor slots and can be expanded to include a video conferencing system if desired. In addition to the generous storage area, it also offers sufficient storage space for documents, advertising material and additional equipment in the body.

## Features

- > 2 x 65" display
- > Touch panel control
- > Barco ClickShare
- > 6 retractor slots to choose from
- > 2 x USB / USB charger

# LECTERN

**Our lectern offers comprehensive comfort for the speaker and highlights digital content in particular.**

Equipped with an electric stroke of up to 500 mm, our lectern can be individually adapted to the size and preferences of the speaker. The head-on 43" display offers the possibility to show e.g. information about the event or the speaker, to place logos or to play presentations and movies (also controllable from a distance). Technical features such as the flat LED reading lamp made of stainless steel, swing mounts to accommodate speaker microphones, integrated connection options and a shelf for technical equipment offer further convenience for the user.

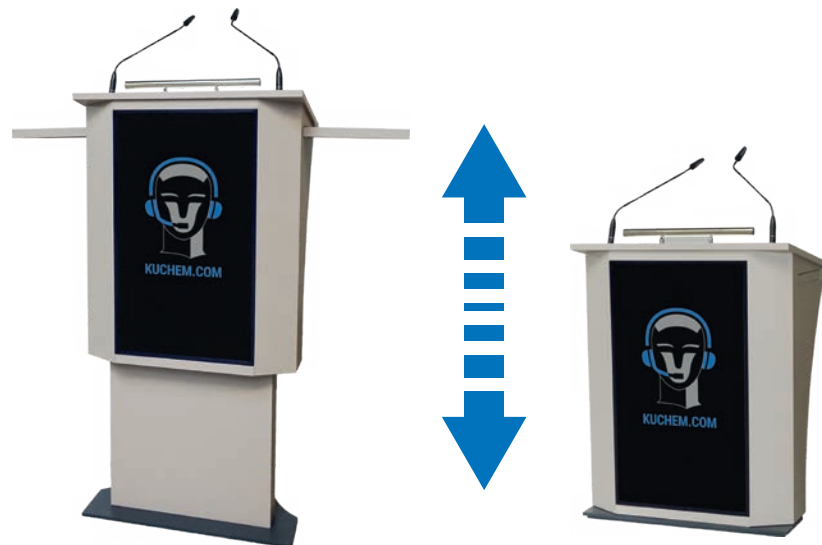

## Features

- 43" display with integrated media player
- electrically height adjustable (lifting height up to 500 mm)
- control via push button
- image transmission system
- flat LED reading lamp made of stainless steel
- swing mount for speaker microphones
- high stability
- 9 standard colors to choose from

# BARRIER-FREE LECTERN

**Our BARRIER-FREE LECTERN is specially designed for wheelchair users.**

The barrier-free version of our lectern is equipped with a 32" display due to the lower output height and is optimally adapted for use with wheelchairs. The electric height adjustment, with a stroke of up to 500 mm, allows it to be individually adapted to the seated or standing speaker. In addition to all the features of the standard version, it also offers pull-out side trays for document storage, integrated piezo anti-trap protection and control via a smartphone app.

## Features

- 32" display with integrated media player
- electrically height-adjustable (lifting height up to 500 mm)
- control via push button or smartphone app
- flat LED reading lamp made of stainless steel
- swing mount for speaker microphones
- integrated piezo anti-trap protection
- optimized use with wheelchairs
- 9 standard colors to choose from

# SINGLESTAND

**Our universal display stands are true multi-talents.  
Stable and yet mobile, they fit into any environment.**

The SINGLESTAND is made of powder-coated steel and can be equipped with displays from 55" to 65". The front button is individually configurable within the RGB color space. In addition, the support system is designed to allow for the retrofitting of a conference camera at any time. The lockable rear technology compartment provides ample space for features such as the Barco ClickShare system, which allows wireless transmission of desired content. This model is available in a round tube design or a square variant.

## Features

- 65" display, 24/7 operation
- matte display without reflection
- integrated media player
- push button with LED feedback
- quad-core processor
- rear technology compartment
- sturdy steel stand with solid base plate, powder-coated
- available in all common RAL colors

# SINGLESTAND XL

**The SINGLESTAND XL offers reliable stand for large displays up to 85".**

The XL version of the SINGLESTAND is also made of powder-coated steel, but can be equipped with displays up to 85" in size. The front push button of the in-house developed control system offers individually configurable LED feedback in the RGB color space as desired. Features such as the generous rear technology compartment and the possibility to integrate an additional video conferencing system are also given. For mobile use, a rolling stand is optionally available.

## Features

- 85" display, 24/7 operation
- matte display without reflection
- video conferencing system
- integrated media player
- push button with LED feedback
- optional with rolling stand
- rear technology compartment
- stable steel stand with solid base plate, powder-coated
- available in all common RAL colors

# TWINPOD / TRIPOD

## Our display stands as a design variation.

Depending on the area of application, TWINPOD and TRIPOD offer all the advantages of the SINGLESTAND (up to 65"-display) in an extended design – with two legs on a stable base plate or in the classic tripod design with three legs (up to 55" display). Both display stands are made of powder-coated steel. The LED control button can be individually configured in terms of color. Our universal technology compartment on the back, with enough space for the installation of additional components is also included.

## Features

- 65"/55" display, 24/7 operation
- matte display without reflection
- integrated media player
- push button with LED feedback
- quad-core processor
- rear technology compartment
- sturdy steel stand, powder coated
- available in all common RAL colors

# BIG LIFTER

**Our BIG LIFTER can be perfectly integrated into any presentation environment.**

The solid steel is designed for displays up to 98" and is suitable for heavier touch displays. The electric height adjustment allows digital content to be optimally adapted and interactively presented in any environment. The sturdy base plate ensures a safe and stable stand with a stroke of up to 650 mm. The BIG LIFTER does not require a fixed installation and can be set up at any location via the electrically lowerable rolling stand.

## Features

- 85" touch display, 24/7 operation
- electrically height adjustable (lift height up to 650 mm)
- roller stand base, electrically lowerable
- concealed heavy-duty castors (D = 100 mm)
- corpus for holding devices (up to 6 x 4U)

# HIGHTIMES

**Our HIGHTIMES is ideally suited as a prominent information board or as a wayfinding system.**

The mobile digital signage stele can integrate displays up to 43" in the perfectly adapted steel frame. With a height of over two meters, it makes the desired, digital content clearly visible all around. This stele also requires no permanent mounting and can be placed in any location. The sturdy, powder-coated steel frame is available in all common RAL colors.

## Features

- 43" display, 24/7 operation
- matte display without reflection
- integrated media player
- service connections, rear side (USB/LAN)
- solid metal body, powder coated
- solid base plate, powder-coated
- available in all common RAL colors

# COLOR SELECTION

Our media furniture that is not made of steel comes with a comfortable matte finish. The special PerfectSense coating not only looks classy, but also feels it. PerfectSense stands out from other furniture surfaces due to its high quality finish. The special anti-fingerprint property prevents annoying fingerprints on the surfaces and significantly reduces the cleaning effort. The trendy, warm and velvety design is available in matte natural colors, from graphite black to alpine white.
